Elks' Celebration Wonderful Success

While as late as Monday morning
prospects for the Champion celebra-
tion were about as dull as they pos-
sibly could be the edict had gone out
that the day would be held and while
the roads were almost impassable and
morning dawned cloudy and threaten-
ing preparations for the event were
hastened and were finally completed
early in the forenoon. By noon the
people had begun to arrive in con-
siderable numbers and when the first
baseball game between Vulcan and
Champion was called there was no
doubt as to the ultimate success of
the day.

The street pageant suffered the
west from the bad weather which
prevailed so persistently. Floats be-
ing prepared were abandoned and the
muddy streets were not favorable to
the decoration of cars. That this item
of the program was carried out at all
is highly creditable to those who car-
ried their efforts to conclusion de-
spite the most unfavorable conditions.

Considering the condition of the
roads the attendance was surprising
the estimate of 1,200 people being
well within the actual figures. Cars
continued to arrive until late in the
afternoon, some of the pleasure seek-
ers having an interesting time in
getting over the roads.

(Continued on back page.)

The contract for the new school has
been awarded to T. K. McNeill, of
Lethbridge, for the sum of \$26,080,
while the contract for the heating
apparatus goes to a Medicine Hat
firm. Construction is expected to
start in a few days. The new building
will be one of the most modern in con-
struction of any school building in
the province.

C. G. Minard reports 120 acres of
crop in head on Sunday, July 1st. All
over the country early fields are be-
ginning to head, but this is the first
instance of complete heading of a
field that has been brought to our
attention. The weather has been per-
fect for the development of the grain
in the shot blade and if final results
correspond to any degree with present
prospects the 1928 crop will be one
of the best ever harvested here.

This week a considerable number
of residents of this vicinity will leave
on their holidays.

H. E. Gill and family and Mrs. E.
Gill left on Wednesday for Vancouver
via auto. The trip will extend over
some two to three weeks.

The Vulcan celebration was post-
poned from the 2nd of July to the 6th.
Travellers are putting on a day's sports
on July 26th. The program being
offered is a comprehensive one and
should attract a good attendance.

**NOBLE TO LEAD SEARCH—
WILL RETURN BY PLANE TO
SCENE OF TRAGEDY TO SEEK
LOST MEN**

Rome, June 28.—General Umberto
Noble will return by air to direct
the search for the ice-bound crew
of the dirigible Italia, says a dis-
patch today in L'Avanti Italia.

The decision to permit the return
of General Noble, says the paper,
was made after physicians had de-
termined that the mental and
physical condition of the Italia's
commander were satisfactory.

It was emphasized that General
Noble had demanded authorization
to fly back to his companions soon
after he had been rescued and trans-
ported to Virgo Bay. Permission was
denied him at the time because of
the fact that he was suffering from
exhaustion and injuries.

As soon as weather conditions are
favorable, therefore, he will proceed
with either Major Maddalena or
Major Penna to explore the scene of
the tragedy.

**INDIAN AFFAIRS DEPARTMENT
IGNORES SO-CALLED IN-
DEPENDENCE DICTUM**

Ottawa, July 3.—The department
of Indian affairs does not propose
to take any action on the so-called
declaration of independence issued
from Detroit by Richard Johnson,
minister of justice and intelligence
for the Six Nations Indians near
Brantford.

Information received at the de-
partment indicates that Johnson
who is not an Indian himself, re-
cently visited the reserve posing as
an English solicitor.

"The elective council, functioning
on the reserve is doing very nicely
and everything is getting along very
satisfactorily," the department stated
in referring to the present system of
municipal government on the re-
serve.

Latest reports from the Six Na-
tions reserve show that quiet pre-
vails among the Indians.

Local and General

Found—Rim and tire, 20x440,
northeast of town. Apply at
Chronicle office.

Mrs. Stevens left for Calgary
on Wednesday where she will
reside in future.

Miss Smithson, Miss Barclay
and Miss G. Woodhull left for
Edmonton on Monday.

A. W. and Lyman Jopling
and Mr. Harris were visitors at
Calgary during the week.

Mr. and Mrs. Guy Dow and
family left recently on an ex-
tended tour of the States.

Mr. and Mrs. A. S. Roberts
of Barons are among the num-
ber holidaying at Sylvan Lake.

Mrs. Little, of Stavely, has
been visiting her daughter,
Mrs. B. Hammel during the
week.

Mr. and Mrs. Geo. Dupue and
family and Miss Olive Larkins
left on Thursday morning for
Sylvan Lake.

Mr. and Mrs. G. A. Manhard
returned from a trip up North
and was accompanied by plenty
of moisture as usual.

Mrs. W. C. Hoskins and
family left this week for
Sylvan Lake where they will
spend the summer.

George Stoddard is ill and is
in the Calgary hospital. Many
friends here will hope for his
early restoration to health.

Mr. and Mrs. Horace Gill and
family, and Mrs. T. Gill left on
Tuesday for Vancouver where
they will spend their holidays.

K. R. McLean R. O., Sight
Specialist, 212 Herald Bldg.,
Calgary, will make his monthly
professional visit to Champion,
at the Drug Store, Friday, Aug-
ust 3rd.

Henry Philpott and Ted Ash-
more found land to their liking
in the Peace River District,
located claims near St. John
on the B. C. boundary.

R. I. Baker left for Calgary
on Monday, where Mrs. Baker
has already preceded him. He
will go from there to Edmon-
ton where he will read examina-
tion papers.

Mrs. Harvey Jopling's pupils
made a presentation to her in
memory of the pleasant hours
of study which have closed.
Mrs. Jopling and Miss Barclay
are the teachers who will not
return. Miss Barclay goes to
Red Deer.

The manager of the wheat
pool elevator requests all those
who have wheat they wish
handled in this year to have
same in the elevator by July
13th as he is leaving on his
holidays on that date.

W. M. Duncan, in charge
of the instruments recording
the rainfall in this district
furnishes the Chronicle with
the information that from June
17th to 30th the total pre-
cipitation was 2.82 inches. From
July 1st to 9 a.m. on July 6th
the amount was 1.29 inches.

Extensive building operations
are in progress in the district.
No table among these are a new
box 7, 54x50 feet, being erected
by I. O. Warren and a machine
sized 40x60 put up by Peter
Helm. C. D. McDougall has a
new house at a cost of \$1800
and A. S. McDougall has an
addition to his residence under
way. G. F. Smith has begun
the building of an office on the
lots south of the old Canadian
Bank of Commerce building
and W. C. Hoskins is rearrang-
ing the interior of his hardware
store. Work on the new school
building will start in a few
days.

Leave Your Order Now for

Raspberries & Cherries

The quality of those arriving and their
condition is excellent.

Apricots

Will arrive around the 10th
of July.

We are advised that the rain has in no
way affected this crop, but if you need
Cherries you will have to place your order
early, for the rains have damaged 50 per
cent of the crop.

DAY, June 28, 1928

NOTES AND COMMENT.

The gratifying success attending the celebration on July 2nd is evidence that organized effort is always better than any possible where individuals fail to pull together. The Elks are to be congratulated on their first attempt in public entertainment, and their future efforts in this direction will have the very best support the community can give.

After a considerable period of wet weather it would appear we are to have sunshine for a time. Everyone was pleased to see the rain when it was needed and will welcome the sunshine which is needed to get the full benefit of the moisture.

Summerfallowing

(Experimental Farms Note.)

The primary objects of summerfallow are to conserve moisture, kill weeds, make plant food available, and to lighten the spring work by preparing land for the following year.

The conservation of moisture, killing of weeds, and making plant food available are all promoted by the same treatment within certain limits. This limit is excessive cultivation which is necessary to eradicate certain perennial weeds but which renders the soil more liable to blow and, to some extent, sacrifices plant food.

The method of summerfallowing which has proven most successful at the Northern Station, where annual weeds are present, is shallow cultivation in the fall or early spring, either by plowing, cultivating, or discing, plowing in June or before the weeds have made much growth, and cultivation to keep down weed growth for the remainder of the season. If weed growth can be kept down until late June or early July by shallow cultivation, it will lessen the need for cultivation after plowing, which often works the soil so fine that it blows readily. On land which tends to blow readily the drag harrow should be used if it can possibly be avoided after the plowing has been done.

Where only annual weeds are present, a good growth should be allowed to start and then cultivate thoroughly to kill all weeds. If a cultivator or rod weeder is used for this work it will be necessary to go over the land only two or three times and the soil on the surface will be left in a lumpy condition which will aid in checking soil drifting. If perennial weeds are to be contended with, cultivation should be frequent enough to prevent them forming leaves, in order to starve the roots. Where couch grass is present more thorough cultivation still may be required, as the roots of this weed have to be worked out of the soil. Plowing should also be earlier where perennial weeds are to be killed.

In summerfallowing where only the ordinary annual weeds are to be contended with the general principle is to keep down weed growth with cultivation, as it has been proven that the greatest loss of soil moisture is through the leaves of plants.

THE NEW VIEW OF HISTORY

It was not until the eighteenth century that historians had the courage to write critically and impartially of the events of their times. Hume, in Scotland, and Voltaire, in France, first attempted a comprehensive presentation of facts.

Because It Is Farmer Owned

Because it is farmer owned, farmers expect, and they have a right to expect, the highest possible standard of service and treatment at elevators of this farmers' company.

And many farmers tell us that they do get such service and treatment at U.G.G. Elevators.

In their relation to the social and economic bearing on the lives of the masses.

This new view of history was in sharp contradiction to the chronicles of earlier times, which were devoted to the exploits of kings and nobles, foreign victories and the glorious suppression of domestic uprisings against administration oppression. The common people had no place in the picture, and their fate was of little moment, only insofar as they were useful to the furtherance of the ambitions of the upper classes.

The ancient notion of the divinity of kings and the inherent superiority of the aristocracy determined the attitude and policy of the ruling classes, and it was not until the violence of the French Revolution had horrified the world that the principles of liberty, equality and fraternity found able advocates who had the courage to proclaim their faith in Great Britain. Many of these reformers suffered persecution and exile for their opinions.

The second Reform Bill of 1867 was objected to on the grounds of a wholehearted support of the working classes as compared to the bourgeoisie, and the same charge of superiority, though in a smaller degree, was noticeable during the discussions of Lloyd George's reform proposals of 1910 and 1911.

Some historians believe that the course of history has been determined by economic considerations, and in the main this is probably correct, but rarely, till very recently, have these considerations been dissociated from traditional class consciousness.

This century has seen the development of a new point of view in the interpretation of history in its relation to the social sciences and social intelligence. Historians have definitely thrown up the brief for special interests and are now concerned with the welfare of humanity as a whole.

The new presentation of history is indicative of the radical change in public opinion within a generation for the historian is the child of his age.

Social values are more and more becoming the measuring standard by which the value of national and international movements must be estimated.

GEN. OREGON IS PRESIDENT OF MEXICO AGAIN

Mexico City, July 2.—General Alvaro Oregon was on Sunday elected president of Mexico for a six-year term, commencing December 1, and during which he has indicated he intends to continue substantially the policy of the present president, General Plutarco, Elias Calles. General Oregon was the only candidate for the presidency.

The day passed quietly in Mexico City, where the most complete precautions were taken to maintain order.

AL SMITH DEMOCRATIC NOMINEE—NEW YORK GOVERNOR SWEETS NOMINATION WITH LARE MAJORITY

Houston, Texas, June 29.—The Democratic nominee for president in Governor Alfred E. Smith of New York.

The party standard was placed in his hands by the Democratic national convention last night, a solitary ballot sweeping him far beyond the two-thirds majority needed to nominate.

Although at the conclusion of the roll call of the states, Smith was a handful of votes short of the two-thirds needed to nominate, he was so near the mark that state after state broke away from the favorite sons and voted for him. The result was a noisy rush to be the first to lay their support at his feet.

The official tabulation, after all changes of votes in favor of the leader had been recorded, gave Smith 819 2/3 of the 1167 votes in the convention. He needed only 733 1/3 to nominate.

Today the convention concentrated on selecting a vice-president. Senator Robinson of Arkansas, convention chairman, has been the favorite, but others are also under consideration.

Impressive gestures of harmony and conciliation preceded and followed Governor Smith's selection last night as the party leader.

Just before the ballot was taken a party platform, contrary to the usual case, was adopted without a fight in open convention. After the nomination had become a fact, his most active rival, Senator Reed of Missouri, told delegates that no one would be more loyal than he to the newly-chosen party nominee.

The prohibition issue, which had been prominent with the Smith and anti-Smith tug-of-war from the beginning, disappeared from the convention picture almost as if by magic just before the nomination was made.

After many hours of debate in committee and sub-committee a plank was found that satisfied the most prominent of Smith and anti-Smith leaders. Composed of only two sentences, it declares the Republicans have not enforced the prohibition law and pledges the Democratic nominee to make an honest effort for enforcement of that and all other statutes.

Then, in less time than it takes to tell it, the committee report was adopted with a crashing chorus of approval and only a few scattered "no's."

The only other part of the Democratic declaration of principles to make serious trouble in committee was the main party farm plank. As finally adopted, it pledges the party to take immediate and effective steps to deal with the problem of farm surpluses and the rehabilitation of agriculture generally. Some party leaders believe that Governor Smith will make a more detailed announcement of this subject early in the campaign.

Big Features found in no other Low-Priced Six

AMONG the scores of advanced engineering features that contribute to the impressive quality of the New Series Pontiac Six, there are three advancements worthy of special notice—three important features found in no other six at Pontiac price.

First, the New Series Pontiac Six offers the smart styling, the luxurious comfort, the rich appointments and the staunch construction of bodies by Fisher.

Second, the New Series Pontiac Six engine embodies the new G.M.R. (General Motors Research) cylinder head, which uses ordinary gasoline to achieve amazing smoothness and silence with economy of operation.

Third, Loveloy Hydraulic Shock Absorbers—standard equipment on the New Series Pontiac Six, provide an ease of riding that makes the roughest roads seem smooth.

Here are three big features that no buyer of a six at Pontiac's price can afford to overlook. Even if the New Series Pontiac Six offered no other exclusive advantages, it would still hold its position as the world's finest low-priced six.

Ask your dealer about the G.M.A.C. Deferred Payment Plan which makes buying easier.

FIRST AID IN CASES OF POISONING

As with many other emergencies in life, the treatment of a case of poisoning is largely a matter of common sense, of keeping one's head, and of seeing that others do so too.

To send for a doctor is of course, one of the first and most important steps to be taken in a case of poisoning. But a doctor may not be found at once, and meanwhile life may go. It need not do so in many cases if the person in charge knows what to do. It is not expected that all should know the antidote to every poison, but all should know the general principles involved.

If it is a case of attempted suicide, no bottle, half empty or full should be thrown away. The same applies to vomited matter and anything else the doctor may want to see when he arrives. Do not leave the patient alone.

There are two general rules to follow—Get rid of the poison, administer the antidote. If the poison has been taken by mouth as it usually is, empty the stomach. Induce vomiting by tickling the throat or by giving an emetic of one tablespoonful of mustard to one half pint of warm water, or two tablespoonfuls of salt to the same quantity. When the stomach is empty give the antidote. Although most antidotes are peculiar to certain poisons, there are some so called general antidotes. One of these that can be had at a moment's notice is albumin in the form of the white of an egg. Give two or three whites in a glass of warm milk. Another general antidote is soap which may be dissolved in four times its bulk of hot water, the patient being made to swallow the thick suds in large quantities.

Always remember that the patient may be on the verge of collapse and that the treatment must not be so heroic as to exhaust him unnecessarily. He should be warmly covered, allowed to drink freely of warm water, and if throat and mouth are inflamed relief can be obtained by sucking gum.

Free booklets on first aid may be obtained from the Red Cross Society, 408, Civic Block, Edmonton, Alta.

NEW LIGHT ON JONAH

During the notorious evolution trial in Tennessee, the Rev. Dr. Bryan was asked if he believed the story of Jonah and the whale, as recorded in the Old Testament. He was literally true, and he replied that he believed the story in every detail just as he accepted the account of the creation of the world as told in the Book of Genesis.

It is unfortunate that Mr. Bryan could not have heard that Mr. Bryan could not have heard the latest version of this tale which has provoked an amazing lot of controversy. While on his recent round-the-world tour, W. H. Mallie picked up at Nineweh some new facts about the adventures of Jonah that link that ancient hero with the ways of modern life.

Nineweh was the Paris of the East—a gay and pleasure-loving city that provided every opportunity for indulgence in the oldest kind of sins in the newest kind of way, and was commonly known as "The Whale."

Into this whirlpool of temptation Jonah disappeared, ran a riotous course for three days, finally came to himself, and, filled with repentance, proceeded about his appointed business.

Bryan bitterly opposed the theory of evolution because it did not agree with his belief in the literal accuracy of the Bible, but who says what is literally accurate without a full knowledge of the meaning attached to the words, idioms and phrases at the time the events took place, or were first related?

Jonah's submarine exploits have too long continued to be a bone of contention among Bible readers. There is probability and reason in Mr. Mallie's interpretation of a bewildering mystery, and it is regrettable that Mr. Bryan missed the chance of turning it over in his mind.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION—PREPARE FOR SCHOOL

The summer vacation should be used to prepare children for school. Any parents who have been advised by the school physician or the family physician that their child is in need of medical care, and who have not acted upon the advice should attend to it without further delay.

The parent of a child who will enter school for the first time in the autumn would be well advised to have the child examined by the family physician, in order to find out whether or not he is in need of any treatment.

Now is the time to have any physical defects corrected. The child then has the summer in which to build up his vitality, and will enter school physically fit. There is no question that the child who is physically fit, to begin with, and who leads a regular hygienic life is the one who develops best both physically and mentally.

Children with diseased tonsils

adenoids, diseased teeth, or who require glasses are very definitely handicapped. Children who do not receive proper food, who have not sufficient rest, who do not play out of doors are stunted physically and dulled mentally compared with what they should be.

Children should be vaccinated against smallpox and immunized against diphtheria before starting to school. This should be done in the first year of life, but if it has been neglected, it should be done—Now. Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered by letter. Questions as to diagnosis and treatment will not be answered.

NOBLE SAFE ABOARD BASE SHIP CITTA DI MILANO AT VIRGO BAY

Kings Bay, Spitzbergen, June 25.—General Umberto Nobile today was aboard the base ship Citta Di Milano at Virgo Bay recovering from injuries sustained when the dirigible Italia crashed on the polar ice on May 25.

Soon after he was rescued from an ice floe by a Swedish aviator, Nobile was aiding in the search for his missing comrades of the Italia with his advice and knowledge of the ice conditions.

Aside from those in the balloon part of the Italia, searching parties were anxious to trace three members of the crew who were with Nobile but who have been missing since May 30, when they started effort for land.

A Swedish plane equipped with skis made a landing near Nobile's camp on the ice near Pope Island, a feat which the Italian rescue fliers here had thought impossible. A little later the plane took off with the injured leader, leaving his five companions still stranded on the ice.

Second Attempt Disastrous The Swedish flier, having brought Nobile to safety, returned to the other marooned men to take them off the ice floe. There it made a second landing but overturned in the attempt. The pilot was not injured, but apparently he was stranded with the Italia survivors.

Rumors that the Russian ice-breaker Maelin, now on its way to Kings Bay to join in the rescue work, had picked up SOS signals from the missing Amundsen party were dissipated when advices from Moscow said that the ship had reported it received no such signals.

A second Russian ice-breaker, the Krasin, was ordered to keep a sharp lookout for Amundsen.

To Rescue Rescuer Oslo, Norway, June 25.—Advices from Spitzbergen state that Swedish airmen are starting today from the vessel Gues, in an effort to reach King Bay to join in the rescue work.

Rumors that the Russian ice-breaker Maelin, now on its way to Kings Bay to join in the rescue work, had picked up SOS signals from the missing Amundsen party were dissipated when advices from Moscow said that the ship had reported it received no such signals.

A second Russian ice-breaker, the Krasin, was ordered to keep a sharp lookout for Amundsen.

Report Persists London, June 25.—An Exchange Telegraph dispatch from Paris quotes the newspaper L'Information

as publishing a report from Moscow that the Russian ice-breaker Krasin is in communication with Raoul Amundsen and his five companions, missing in a French seaplane.

The dispatch said that Russian aviators would attempt to rescue the men with a Junkers plane which is owned by the ice-breaker. The plane sailed from Bergen for Kings Bay, Spitzbergen, last week, and was to cover virtually the same route which Amundsen had planned to follow.

Amundsen was accompanied by Lieut. Dietrichsen, Norwegian explorer, and four French naval airmen under the command of Rene Guilhemard, noted flier.

Amundsen was accompanied by Lieut. Dietrichsen, Norwegian explorer, and four French naval airmen under the command of Rene Guilhemard, noted flier.

Amundsen was accompanied by Lieut. Dietrichsen, Norwegian explorer, and four French naval airmen under the command of Rene Guilhemard, noted flier.

125 Times Around the World

In pursuing its policy of consistent progress—in its continual search for new ideas—in its constant development of better cars; General Motors not only maintains its great International Research Laboratories and hundreds of skilled engineers, but also operates the first, largest and most completely equipped automobile proving ground in the world.

Here, on the vast fourteen-hundred-acre tract of the General Motors International Proving Ground, every type of road is duplicated, every condition of driving is

reproduced. Here all makes of General Motors cars are constantly being subjected to the most searching tests. Here every principle developed by General Motors engineers is put to proof... every detail of each test car's performance carefully and closely checked. Here years of normal use are crowded into a few months of continuous, grueling operation.

A typical example is offered by Chevrolet. Since the opening of the General Motors Proving Ground, Chevrolet cars alone have piled up over three million miles of

testing... a distance equal to 125 times around the world.

In the countless millions of miles that General Motors cars have covered on the General Motors Proving Ground, there has been one great purpose kept in view: to improve by constant testing, the quality and worth of every General Motors product.

Every Canadian buyer of a General Motors car gets a car built in Canada by Canadians to meet Canadian conditions of road and climate... a better car and a greater value because General Motors uses so freely and unparagonably its unequalled facilities for testing and research... the journey, millions of miles at the end of the journey, millions of miles is not too far to go.

as publishing a report from Moscow that the Russian ice-breaker Krasin is in communication with Raoul Amundsen and his five companions, missing in a French seaplane.

The dispatch said that Russian aviators would attempt to rescue the men with a Junkers plane which is owned by the ice-breaker. The plane sailed from Bergen for Kings Bay, Spitzbergen, last week, and was to cover virtually the same route which Amundsen had planned to follow.

Amundsen was accompanied by Lieut. Dietrichsen, Norwegian explorer, and four French naval airmen under the command of Rene Guilhemard, noted flier.

how! ANOTHER EXCLUSIVE FEATURE

The silent Willys-Knight sleeve-valve engine plus a Belflex silenced chassis now make a completely silent car.

From the first turn of its sleeve-valve engine, the most powerful, most highly efficient and quietest in operation of all cars of its type or class—the Willys-Knight Six—gains in power, gains in efficiency, gains in smoothness and silence with every mile.

And now—Belflex Shackles—still another new and exclusive Willys-Knight feature—a tremendous shock-absorbing device on the unsatisfactory and noisy metal shackles of other cars. Belflex guards against all chassis rattles and squeaks. It deadens road vibration, eliminates all road for shackle lubrication.

Belflex provides that the sprung parts of the car are insulated from the unsprung parts with a noiseless, flexible, shock-absorbing rubberized—thereby affording permanent shock-absorbing and eliminating wear at every point of the car.

Examine the new "72" Willys-Knight Six or the Great Six, yourself! Willys-Knight, Ltd. has more definitely emphasized than in the extraordinary beauty and performance ability of these fine cars.

Willys-Knight Great Six prices from \$2775 to \$3000. The new "72" Willys-Knight Six, companion car to the Willys-Knight Great Six, from \$1925 to \$2000. Prices F.O.B. factory. Taxes extra.

Another Step Toward Permanent Peace

Throughout the years of the Great War, the people of the allied nations were repeatedly told that it was a war to make the world safe for democracy, "a war to end war." And when at last the great struggle ended and the League of Nations came into being it was thought that, with the better experience of the war fresh in all minds, there would be little hesitation on the part of any country to join the League, and that, with 100 per cent. world membership in the League, world disarmament would follow in due course.

The refusal of the United States to have anything to do with the League of Nations—the very country in which the idea originated—came as a rude shock to all lovers and advocates of peace. It discouraged Bardsley, re-awakened all the old fears, and actually led to renewed activity in the piling up of armaments. Nevertheless, the League struggled on, gaining new adherents, and, with each succeeding success in settling international disputes and preventing open rupture, the League grew in strength and prestige. Nonetheless, so long as the United States remained aloof it was felt that the structure for world peace was imperfect and insecure.

Because of this fact, the recent action of Mr. Kellogg, United States Secretary of State, in inviting the nations of the world to enter into a multilateral treaty to outlaw war, was enthusiastically welcomed by all lovers of peace, and nowhere quite so heartily as in Canada and other parts of the British Empire.

Already fifteen nations, including, with the exception of Russia, all the Great Powers, have signified their willingness to sign such a treaty. The draft of this momentous international document is brief and to the point, and as it may well prove to be the Magna Carta of world peace, it is worthy of the widest possible reproduction in order that all people, everywhere, may read it. The preamble, in part, is as follows:

"Deeply sensible of their solemn duty to promote the welfare of mankind,

"Persuaded that the time has come when a frank renunciation of war as an instrument of national policy should be made to the end that the peaceful and friendly relations now existing between their peoples may be perpetuated;

"Convinced that all changes in their relations with one another should be sought only by pacific means and be the result of a peaceful and orderly process, and that any signatory power which shall hereafter seek to promote its national interests by resort to war should be denied the benefits furnished by this treaty;

"Hoping that, encouraged by their example, all the other nations of the world will join in this humane endeavor, and by adhering to the present treaty as soon as it comes into force, bring peoples within the scope of its beneficent provisions, thus uniting the civilized nations of the world in a common renunciation of war as an instrument of their national policy."

Then follows the names of the fifteen nations who have signified their willingness to sign such a treaty, namely: Australia, Belgium, Canada, Czechoslovakia, France, Germany, Great Britain, India, Free State, Italy, Japan, New Zealand, Poland, South Africa, United States of America.

To what do they agree? Having approved the declarations in the preamble quoted above, they bind themselves as follows:

"Article I. The high contracting parties solemnly declare in the names of their respective peoples that they condemn recourse to war for the solution of international controversies, and renounce it as an instrument of national policy in their relations with one another.

"Article II. The high contracting parties agree that the settlement or solution of all disputes or conflicts of whatever nature or of whatever origin they may be, which may arise among them, shall never be sought except by pacific means.

"Article III. The present treaty shall be ratified by the high contracting parties named in the preamble in accordance with their respective constitutional requirements and shall take effect as between them as soon as all their several instruments of ratification shall have been deposited at ————.

"This treaty shall, when it has come into effect as prescribed in the preceding paragraph, remain open as long as may be necessary for adherence by all the other powers of the world. Every instrument evidencing the adherence of a power shall be deposited at ————, and the treaty shall immediately upon such deposit become effective as between the power thus adhering and the other powers parties hereto."

"That is the whole document, beautiful in its simplicity, momentous in its sweeping renunciation of war under any and all circumstances. It does not replace the League of Nations, but adds power and strength to it. No isophores are left, and should any nation signing this treaty ever again resort to war it would become, as never before, an outlaw among the nations.

Substitutes Cards For Pistol

Affair Of Honor In Czechoslovakia Settled In New Way

Pistols have given way to cards in the settlement of "affairs of honor" in Czechoslovakia, judging by the method adopted by a business man at Brno, near Prague, to avenge an insult.

An engineer in the town is said to have given offence to a business man, who challenged him to a duel.

A Wonderful Performance

Recent Flight Over Pacific Was Great Achievement For Flyers

The great flight over the Pacific Ocean by the Australian, Captain Kingsford-Smith, leader, and his companions, puts British prestige at the peak in this form of endeavor. The "Southern Cross" winged its way to fame under control of four men, each performing an essential task in making the trip scientifically safe and sane. This feature alone raises the Pacific flight out of the category of regular daredevil stunts and enhances notably the merit of the performance. Regular radio reports received from the Southern Cross during its flight robbed the journey of some sensational features beloved of the crowd, but detracted not a bit from the glory won by the fliers. Their accomplishment is the more valuable because they made use of every possible device to combat the fury of the elements with man's most powerful weapons.

HOW DELICATE GIRLS ARE MADE STRONG

Rich, Red Blood Needed To Keep Up Their Vitality

It should be borne in mind that pale, bloodless girls need plenty of nourishment, plenty of sleep, plenty of outdoor exercise. But a lack of appetite and tired, aching muscles tend to hinder them. To save the weak, thin-blooded sufferers from this condition, it is of nothing means a case of this kind so well as Dr. Williams' Pink Pills. These pills not only enrich and increase the blood supply, they help the delicate and delicate girls to get into the weary back and limbs, thus bringing new health and strength and transforming anemic girls and women into cheerful, happy people.

The value of Dr. Williams' Pink Pills in the case of anemic girls is proved by the case of Miss Margaret, daughter of Dr. Williams, N.S., who writes: "Margaret, the age of 12 to 13, is in an anemic condition. I was very thin and nervous, had no appetite and had no desire to go to school. In the things of those of my age, my mother got tired after time for me, but they did me very little. I was told that Dr. Williams' Pink Pills were recommended almost from the first they seemed to be just what was needed to restore my strength. After taking the pills for a time, I felt altogether different girl. I got up in an anemic condition, I was active and ready for work or play. Since then I have kept in the best of condition."

Every weak girl should promptly follow the example of Miss Margaret, feeling sure that the pills will renew her health. You can get the pills from any medicine dealer or by mail 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Show Canadian Films

Views Of Canada To Be Shown In Britain and Central Europe

"Being Canada" films, made by Canadian Government, will be shown in from 300 to 500 British theatres this year as well as in Germany and Central Europe, says Captain King, director of the Canadian Motion Picture Bureau, upon his return from Great Britain. He expressed a belief that the new future Canada would become an important field for the British Empire pictures.

Eskimo Census Taken

A census of the Eskimo people has just been completed. From the most reliable sources it is estimated that there are 7,103 Eskimos in Canada.

The Sioux Lookout Map Sheet

Where the Miner's Pick Now Displaces the Tomahawk

The Sioux Indians were among the handiest as well as the most warlike of the aboriginal inhabitants of North America.

Their memory is perpetuated in the Sioux Lookout map sheet of the National Topographic Series, now issued from the press of the Topographical Survey of Canada. The new map embraces an area lying 100 miles north from Lake Superior and adjoining the Lac Seul map sheet on the west.

The town of Sioux Lookout gets its name from the precipitous hill overlooking it. From the top of the hill, in days gone by, the Ojibways were able to keep watch up and down the waterways from raising Sioux. On one occasion the lookout slept and the Sioux felt upon the camp. They immediately fled to the warriors to man, and destroyed all the canoe. The women and children with one except did not make a sound. The town of the island near the site of the present town, and there they starved to death. The island is still called Squaw Island.

This country with its broken lakes and streams, teeming with fish and chained with rapids and waterfalls is a tourist's paradise. Here are old fur trading posts like Osaubagua, founded over a century ago. At historic Lac Seul the site of the Hudson's Bay Company has a four-hole golf course. (Ingress to the region is by way of the Canadian National Railways and thereafter by innumerable connecting waterways with lanchons, tugs, or canoes.)

This territory is part of the newly discovered mineral horizons, and is blazoned on the area known as the great Canadian shield.

The Sioux Lookout map sheet of the National Topographic Series, on the scale of four miles to the inch, may be obtained in sheet form from the Topographical Survey, Department of the Interior, Ottawa, for the nominal fee of 25 cents. If desired in folder form or linen backed the fee is 50 cents.

For Both House and Stable. — There is a good deal of similarity, physically speaking, between human beings and the lower animals. Both are subject to many ailments arising from inflammation and to all manner of cuts and bruises. Dr. Thomas' Electric Oil is an entirely reliable remedy for such ailments and misadventures in both human beings and the lower orders of animals.

A Great Germ Carrier

Common Housefly Covered With Deadly Disease Germs Says Scientist

The common housefly is literally covered with bacteria and deadly disease germs. Scientists have estimated that many flies carry as many as 6,000,000 germs. This estimate is determined as follows: A fly is placed in a small bottle of water. The bottle of water is then shaken so that the germs will all be washed off the fly, and they will be equally distributed throughout the water. A tiny drop, perhaps a millionth part of the water, is then placed on a glass slide and examined under a powerful microscope. The scientist counts the number of bacteria visible, say six. He then multiplies the six by 1,000,000, since there are about 1,000,000 such drops in the bottle, and his answer is that the fly carried 6,000,000 bacteria.

Manx, the native language of the Isle of Man, is dying out; fewer than 1,000 of the island's 60,000 inhabitants have now any working knowledge of it.

France Has Too Much Coal

Production Rises Until There Is No Need To Import

France, desperately short of coal for ten years, and always an importer, now has too much of it. For the first time French production equals consumption and imported coal is threatening to break the market.

When the Germans flooded French coal mines in the north during the World War, France lost half of her fuel and it has been a long struggle to get back to normal. Not only was the pre-war figure of 40,000,000 tons annually reached, but last year it went up to 60,000,000 and the Saar Valley has added another 13,000,000 tons.

All European coal mines have been working hard since the war because British strikes, the occupation of the Ruhr and the trouble in Upper Silesia created big shortages. Now that all are at work, Europe, according to French figures given to the League of Nations recently, has a surplus of 60,000,000 or 70,000,000 tons a year.

As all countries for generations have considered France as the chief importer of coal, they all still try to capture the market there, ignoring the fact that France now mines all she burns. Therefore the French coal operators are puzzling how to reduce costs; coal production and re-exports no longer will not become too cheap.

Railways Arrange New Circle Tour

Convenient Visit To Glacier, Waterton and Jasper Parks Is Made Possible

An arrangement has been completed by the Great Northern and Canadian National Railways to make available to tourists a circle tour of three of the greatest playgrounds in the world. Under it tourists will be able to visit Glacier National Park, Alberta, without loss of time and at considerable reduction in cost.

The inter-change point between the two companies will be Calgary where passengers en route to Jasper like the Canadian National Railways, and those for Waterton and Glacier will take Great Northern automobiles. The autos and the trains will make connections and summer tourist fares will apply in both cases. In the past it has only been possible for travellers to combine these places in one visit by making a round-about and expensive trip.

The Great Northern and Waterton Parks the Great Northern Railway operates a number of splendid hotels, among which are the Prince of Wales Hotel, the Chateau Park Hotel, and the Many Glaciers Hotel. In Jasper, the Canadian National Railways operate Jasper Park Lodge, a unique and distinctive summer resort.

Don't Cause Asthma. Even a little speck too small to see will lead to ague, which no words can describe. The walls of the breathing tubes contract and it seems as if a very life must pass. From this condition Dr. J. D. Kellogg's Asthma Remedy brings the user to perfect rest. It relieves the passages and makes breathing in and out established again. Hundreds of testimonials received manually prove its effectiveness.

Find Blue Best Color

Blue is the most effective color to attract policemen at night, according to tests made by city officials of Sheffield, England. The city has just installed in outlying districts lamps illuminated by powerful blue lamps, which when lighted by a switch in central office, summon the police to the scene, summoning the police to receive instructions.

Canada's Flying Clubs

Eleven Already Established and Ten More Being Organized

Hon. J. L. Baldwin, Minister of National Defence, has opened the new flying field of the Granby Light Aeroplane Club, Granby, Que.
Canada now has eight aero-plane clubs, extending from Granby, Que., to Victoria, B.C., with ten others in process of formation. Fourteen Aero-Club places have already been allotted to these organizations by the Government under the conditions governing the issue of these machines. Additional to the Granby club, those already formed and with whom agreements have been signed by the Minister of National Defence are:

Montreal, Toronto, Hamilton, Ont., Winnipeg, Regina, Moose Jaw, Saskatoon, Calgary, Edmonton, and Victoria, B.C.

As a result of the process of organization is being completed, the following are located:

Halifax, Saint John, Quebec, Kingston, Ottawa, London, Peterboro, St. Catharines and Walkerville, Ont.

Alberta Act Invalid

Privy Council Upholds Ruling Of Supreme Court Of Canada.

Both the appeal of the province of Alberta and the counter appeal of the Dominion of Canada from the Canadian Supreme Court decision respecting the question of whether the right of the Crown upon intestacy is a provincial or Dominion right were dismissed without costs by the judicial committee of the Privy Council. The case involves the validity of the Ultimate Heir Act of the legislature of Alberta.

The judgment of the Privy Council upholds a ruling of the Supreme Court of Canada that the Ultimate Heir Act of Alberta is invalid. The Act provided that where a person died without legitimate heirs, certain of the property goes to the University of Alberta.

Receives Large Salary

Chief Minister Earned \$30,000 In Nine Months' Whole Hunt

Few occupations tax the nerves of man more than whale hunting, but when the whale-hunting fleet recently returned from the Antarctic after a successful whaling cruise, the taxpayer had earned a "normal" income of \$32,000. In addition to this sum he had a contract granting him \$20 for each whale he killed. During the nine months he killed 300 whales, and his extra income amounted to \$6,000. Hardly one man in a thousand may hope to be a really good harpooner. It is upon his ability that the result of the expedition largely depends, and though his profit may seem high, it is modest compared with the profit he brings to the expedition.

Changes Name Again

Peking Will Be Known As Peiping Meaning "Northern Peace"

The nationalist government politicians in several provinces have decided to change the name of the historic Manchukuo capital, Peking, to Peiping, meaning "Northern Peace."

The action is considered at Shanghai as an attempt by the Nanking government to destroy Peking's political importance and further that of Nanking, which they insist is now the National capital.

The announcement of the action of the council states "It is hoped Peking will continue as a centre of art and culture, but as a political centre it is dead."

Should Be Popular

Aerial tea parties every Friday afternoon throughout the summer have been arranged by the Canadian Airways, to enable Londoners and visitors to see the Metropolitan from the air. A big 21-seater aeroplane will cruise above London for about 20 or 40 minutes, and tea will be served.

Now, children, are you telling fairy stories?

"No, we are discussing the discovery of hankies!"—Lustige Kolner Zeitschrift, Cologne.

old, oil-burning and 75 feet wide, the new liner has broad deck spaces and many marine innovations, all conducive to passenger comfort. She is commanded by Captain H. B. S. R.N.R., whose 21 years in the service of the Canadian Pacific Steamships has taken him through the seven seas. He was formerly in command of the "Minnedosa" and "Montreal," having been in charge of the latter since her conversion to a passenger liner. The West India—a feature to be repeated by the "Duchess of Bedford."

Excellent appointed and furnished, the "Duchesses" open a new era in Cabin Class travel and experienced travellers who have seen the new liners cannot but be very much impressed very favorably with first class ships. Six hundred feet long, two-funnel-

STALWART HEREDIMANS

Three stalwart crofters, all over six feet in height, who left the Hebrides where they "scratch a bare living by tending sheep," to settle in Ontario. They reached Canada last week in high spirits. The picture shows some cabin boys comparing their stature with the settlers aboard the liner Letitia, on which the Heredimans arrived in Canada.

Recipes For This Week

(By Betty Barclay)

FRUZZLED FEET FOR HOT DAYS

Melt butter in hot frying pan, add dried beet, and stir until it browns and sizzles. Add more butter for cream sauce. Add flour and stir until well blended. Add milk gradually until desired consistency is obtained. Stir to avoid lumps.

Use the proportion of 2 tablespoons of flour to 1 cup of milk. If the dried beet is too salty, soak for 10 or 15 minutes in cold water; drain thoroughly and fry by parting between folds of clean, dry cloth. Have dry before adding to melted butter. Serve on toast if you wish.

ORANGE AND RHUBARB SAUCE

2 pounds rhubarb.
2 oranges.
1½ cups sugar.
1 tablespoon granulated gelatin.
1 tablespoon cold water.

Wash rhubarb, cut into inch pieces; peel oranges, removing membranes with peeler, and cut in small pieces; put rhubarb, orange, and sugar in an earthenware or glass baking-dish, and bake about one hour. Dissolve gelatin in cold water, add to rhubarb mixture, and when cool, mix individual pastry shells with sauce and decorate with whipped cream, forced through pastry bag and rose tube.

Came From Many Lands

Common Vegetables Are Few Centuries Ago

Vegetables did not form part of a meal a few centuries ago, as they do today. In those days the dishes consisted mainly of flesh, fish or fowl.

Potatoes were introduced into England by Sir Walter Raleigh from Virginia, over 200 years ago. They did not, however, come into general use until the beginning of last century, when they were very wisely adopted in their skins.

The Romans knew the onion, turnip, cauliflower, and cabbage, to which eat vegetables, they ascribed the quality of preserving them from drunkenness.

Cucumbers are said to have originated in India and were known to have been introduced into China 200 B.C.

The carrot came from Greece, and the English name is derived from a Greek word meaning "root."

POPULARIZING THE ST. LAWRENCE ROUTE

Nothing But the Best Out-of-the-lands but still luxury loving, Constantinople demands only the latest and newest models in automobiles. Some 11,000 second-hand cars are standing idle, waiting in vain for purchasers.

The fast mail voyage of the Canadian Pacific liner "Duchess of Bedford" just put into the service of the St. Lawrence route as the finest of a quartette of 20,000-ton Canadian Pacific steamers has called wide attention to the increased popularity of the St. Lawrence route.

In addition to the "Duchess of Bedford" three other "Duchesses" will shortly be commencing the St. Lawrence route. The fleet of Cabin Class steamers will constitute the largest ships to call at

Montreal. Their time schedule is so arranged that it is now possible to breakfast in Liverpool on one Friday and in Montreal the following Friday—on a unique service for the St. Lawrence.

Excellent appointed and furnished, the "Duchesses" open a new era in Cabin Class travel and experienced travellers who have seen the new liners cannot but be very much impressed very favorably with first class ships. Six hundred feet long, two-funnel-

ing, oil-burning and 75 feet wide, the new liner has broad deck spaces and many marine innovations, all conducive to passenger comfort. She is commanded by Captain H. B. S. R.N.R., whose 21 years in the service of the Canadian Pacific Steamships has taken him through the seven seas. He was formerly in command of the "Minnedosa" and "Montreal," having been in charge of the latter since her conversion to a passenger liner. The West India—a feature to be repeated by the "Duchess of Bedford."

Excellent appointed and furnished, the "Duchesses" open a new era in Cabin Class travel and experienced travellers who have seen the new liners cannot but be very much impressed very favorably with first class ships. Six hundred feet long, two-funnel-

ing, oil-burning and 75 feet wide, the new liner has broad deck spaces and many marine innovations, all conducive to passenger comfort. She is commanded by Captain H. B. S. R.N.R., whose 21 years in the service of the Canadian Pacific Steamships has taken him through the seven seas. He was formerly in command of the "Minnedosa" and "Montreal," having been in charge of the latter since her conversion to a passenger liner. The West India—a feature to be repeated by the "Duchess of Bedford."

Farmers' Marketing Tour

Canadian National Railway's Tour To Great Britain and Denmark, 1928

(Continued.)

New experiences awaited us the following day when as guests of the Port of London Authority, we were taken to see something of what London's handling facilities are. It was not possible to see more than a small part of the Port of London, in one year, handles merchandise to the value of hundreds of millions of pounds sterling. For example, the imports and exports passed through the port in 1926 totalled in value \$2,500,000,000 and included 45,000,000 bushels of wheat. In the same year 20,000,000 tons net register of shipping entered and left the port. Walking through one set of store-rooms, ten acres in extent, we visited the Store Room, where we were introduced to see a perfect specimen of pre-historic mammoth tusks 11 feet long, weighing 15 pounds, and having an estimated age of 50,000 years. In the State Room \$25,000 worth of pepper was stored, and an interesting exhibit of the British Standard in a bath of mercury. The Wood Room which contained a number of bales of Canadian wool stored in a single year nearly 2,000,000 bales.

Another interesting warehouse was the Lardine Room, holding 25,000 small half-bound kegs of lard, every one worth \$500. The Lardine Room is necessary because of the rotting of the lardine which is stored in wooden kegs in a comparatively short space of time.

But the thrill of the day came when we explored a portion of the Port's wine vaults. Here we descended into the cellars where were hauled oil barrels fastened to the end of the wine casks. The temperature of the cellars never varied from 50 degrees, yet the only means of regulating the temperature was the wine is a curious characteristic. The barrels of the wine were absent. Twenty-two thousand pieces of wine, each worth \$500, were accommodated in these vaults which have twenty-eight miles of metal passageways, since from the bottom of spirits contained in other vaults not included in the tour itinerary.

Again in the open air we boarded a launch en route to the S.S. Minnedosa, which was due to leave as guests of the Port, under the command of Lord Balfour of Burgh. The novelty of luncheon on the boat, which was followed by a great liners from almost every country in the world made a deep impression. The trip followed by a great liners from almost every country in the world made a deep impression. The trip followed by a great liners from almost every country in the world made a deep impression.

The next day we were the guests of the Empire Marketing Board at the House in the Hyde Park Hotel and had an opportunity of learning at first hand the valuable work being done by this organization to encourage the consumption of products produced within the Empire. The Board is a non-party body and includes representatives of the Dominions and Colonies. Agricultural research is also an important phase of its work. The chairman, Lord Levis, the Under-Secretary of State for the Dominions, told us something of the work of the Board, which was further explained by Sir Haldane Macdonald, chairman of the Imperial Economic Committee.

One of the most interesting moments of the tour was when we had a visit to the Tower, a grim fortress which has seen the rise and fall of kings, here and on Tower Hill perched some of the most renowned names and women of their day. Here the beautiful Anne Boleyn was executed, and here Lady Jane Grey saw the headless body of her husband carried past her on the morning when she was taken to the block. In it Sir Thomas More, Archbishop Cranmer, Sir Walter Raleigh and the little Princess met their tragic fate, and through these things happened in the days gone by, one feels the Tower to be sinister still. Even in our own time it was not chosen as the place in which the spies in the Great War would meet their doom.

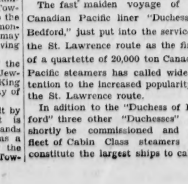

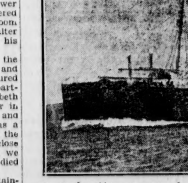

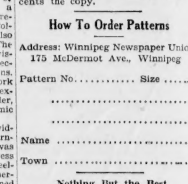

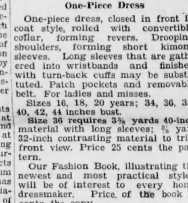

We were admitted by Yeoman of the Guard "Bedfords" who they wear the quaint uniform which was adopted in the time of Henry VII. The Tower is shut at night to the accompaniment of ancient ceremonial and after midnight no one may enter the precincts without giving the password.

In one of the strong rooms of the Tower there repose the Crown Jewels, including the coronation robes of George and Queen Mary, a display of treasure which amazed us all.

The Tower of London was built by William the Conqueror, and it is said that the site on which it stands was selected by Julius Caesar as a location for a fortress. One of the most interesting features of the Tower

is the portcullis, said to be the oldest in existence in working order. On our way to the Tower we stopped at St. Paul's Cathedral, Christopher Wren's masterpiece, but, owing to the gouting operations on the steeple which support the great dome, it was not possible to see its interior to advantage, most of the interior being boarded up and inaccessible. Thus, we did not see the crypt or enter the Whispering Gallery.

(To Be Continued.)

WORLD HAPPENINGS BRIEFLY TOLD

The new German dirigible, LZ-127, may make a trip to El Estero by way of California.

Miss Mercedes Claret, London stenographer, failed in an attempt to swim the Irish Channel to Great Britain.

Assurance that representations made on behalf of the blind in Canada will receive government consideration has been given to a delegation of blind persons by Hon. J. A. Robb, Minister of Finance.

The King has approved the appointment of Sir John Middleton as Governor-General and Commander-in-Chief of Newfoundland, in succession to Sir William Allarday, whose term has expired.

The University of Wisconsin, at Madison, gave recognition to the attainments of its most able former student, Col. Charles A. Lindbergh, by conferring the honorary degree of Doctor of Laws. Lindbergh arrived there by plane.

Fritz Von Opel's rocket car, the Rak-X, was wrecked, but not until after it had attained a speed of 185 miles an hour. This is claimed as a world record on rails. There was no driver in the car.

England's most picturesque visitor, Sir Offit Atia, blue-black potatoes of Akim Abukawa, has received from the King at Buckingham Palace the accolade of his new British knighthood.

Col. Charles A. Lindbergh carries a blanket public liability aviation insurance policy for \$100,000 on any aircraft piloted by him. The policy also covers him for property damage.

Fur-bearing animals in Ontario are growing scarcer each year, as frontiers of civilization move forward, it is indicated in a statement issued by the Department of Fish and Game, which shows that royalties received last year totalled \$12,702, compared with \$13,701 in 1927. The trapping of beaver declined by 12 per cent, but is likely to be still smaller in 1928.

How Far Voice Will Carry

Depends On Atmosphere, Wind and Competing Noises

The distance to which a noisy voice will carry depends upon many different circumstances. The condition of the atmosphere is one—damp will slow down the sound, while a dry, crisp air will forward them easily. Wind is another factor—so is the height of the speaker in regard to the number of objects, trees, rocks and so on in front of him. The number of competing noises also has to be considered. Under ordinary circumstances, few voices will carry intelligibly more than a couple of hundred yards, but this distance has been far exceeded with exceptionally favorable conditions. In the stillness of the frozen North, for instance a voice will carry for over a mile. And as such, as rendered from a mountain top, was once heard at the distance of four miles.

Question Of Relationship

In a recent court case at Toronto, a nice question in relationships was propounded. The plaintiff, a woman, was testifying against a chauffeur, "Isn't he your brother-in-law?" she was asked by counsel. "Didn't you say he was?" "No," she replied. "He was my husband's sister's husband's brother!" The counsel gave up any more questioning on this point.

It has been estimated that a hospital doctor walks an average of 16 miles a day in the course of his duties; a step assistant eight miles; a waiter 12 miles, and a tram conductor seven miles.

Raw recruits are probably no called because they are not accustomed to fire.

Mistress: "Is there anything we require from town?"

Maad: "Yes, the china will not last us over Sunday."—Kasper, stockholm.

CHMAPION CHATTER

VOL. 1

Thursday, July 5, 1928.

No. 21

Published in the interests of the People of Champion and Farmers of this vicinity.
GEO. L. DEPUÉ, Editor.

EDITORIAL
Why is it that a man can be the soul of honor during the whole year and then find it necessary to do a lot of clumsy lying about the size of the fish he caught just as soon as they begin to bite.

Johnny Weiss has played an order for a sweater and pickup and combine.

July 4th in the U.S.A. Despite campaigns for sane Fourth, And have against hard riders, The Fourth will always keep on being A great old news provider.

Oh Boy! wasn't that a glorious celebration.

The old lively horse was wise, He recognized the first symptoms of love making

"Good Equipment Makes a Good Farmer Better"

and governed his gain accordingly.

C. Davis has taken out a 5 ft. heavy mower and a 12 ft. Mc-Dr. Rod weeder.

You have no doubt heard of the man who was so dumb he put a special delivery stamp on a letter mailed to a box number.

M. J. Brett has purchased a 5 ft. Mc-Dr. Mower and 10 ft. rake.

Universal Clinic
Wherever you may travel I'm sure you'll say I'm right. It may be hot in the daytime But it's always cool at night.

The municipality has purchased a new Mc-Dr. mower to help control the weeds in road allowances.

The world loves a lover, boasts a hatter, quite a quitter, and kicks a kicker.

Did you know that—kid gloves are lamb skin. Turkish baths are unknown in Turkey, Irish stew does not exist in Ireland, Egyptian cigarettes are made of Turkish tobacco. Brussels carpets do not come from Brussels at all, and there is no wax in sealing wax? But what's the difference.

Bill Isaacson has a wonderful pulling horse team at least we thought so when we were caught in Tuesday's rain storm. But you should see H. H. Seland and Ed. Elton when it comes to pushing Fords.

Did anyone see any Biks at the celebration? Our Swatner is here.

were no casualties among the 425 officers and men of her crew, and late Monday evening all had been removed except Capt. K. D. W. MacPherson, her commander, and 50 officers and men, who planned to remain aboard all night.

N. DAKOTA RETAINS STATE DRY LAW

Pargo, N. D., June 30.—North Dakota voters have repudiated an attempt to repeal the state's prohibition law. Returns today from Wednesday's election showed that they turned down a proposal to wipe out the dry clause of the state constitution by a small margin—around five thousand votes.

Biks' Celebration

(Continued from front page.)

While many features of the program were necessarily curtailed the big crowd seemed in the best of humor and thoroughly enjoyed themselves. Champion defeated Vulcan in the first ball game to later lose to Lomond in the evening fixture.

The grounds showed the extent of the preparations and were a complete credit to those in charge. The lighting effects and the splendid dancing pavilion and the arrangement of the booths, etc., in connection with the carnival events were excellent. The ladies of the Royal Purple, who catered to the crowd, won golden opinions. As it was impossible to secure the list of prize winners for this issue further details and winning contestants are carried over to next week's issue.

SUNDAY SERVICES

11 a.m.—Sunday School.
Preaching services are withdrawn while the pastor is away on his holidays. He expects to return about Aug. 10.

Double Wedding At Lethbridge

The wedding of H. E. Smith Jr. and Miss Beatrice Strange took place in Lethbridge on Tuesday, the Rev. Mr. Newman officiating.

At the same time and place Esther Innes became the bride of Lloyd Hollingshead.

The contracting parties are well known in Champion and vicinity where many friends will wish them happiness and prosperity.

Local and General

Mrs. Mary Duffy of Calgary is visiting her aunt, Mrs. M. Sisson.

Mr. and Mrs. J. W. Jopling left recently for Great Falls, Mont. and other points.

The regular meeting of the Champion Women's Institute will be held at the home of Mrs. L. Barker on Tuesday July 10th, 2.30 p.m. Roll call, Patriotic Selections; report of Annual Convention A. W. L. Mrs. Stoves, Side-lights on convention, Mrs. Wiser, Canadianization and Immigration, Mrs. Stephenson. Refreshment convener, Mrs. Hummel. Please be prompt.

Mrs. W. R. McRae and Mrs. E. H. Freeze left on Tuesday for Kamloops B. C. to attend the Supreme Lodge convention of the order of the Royal Purple. The delegates who were in Calgary en route to the convention were entertained to lunch at the Empress Grill and afternoon tea at the Tea-Kettle Inn by the members of Calgary Lodges.

Mrs. Hunt and children are leaving for holiday at Lumsden Beach, Sask. Mr. Hunt will spend a short holiday in Ontario with his father, returning to join Mrs. Hunt in Sask.

Consequently there will be no service this next Sunday evening July 8th, or following until his return. Sunday school will be carried on every Sunday, that no children may be without their usual Sunday morning session. The pastor hopes all may have a happy summer.

GOV. GENERAL WILLINGDOM MAY VISIT WATERTON NATIONAL PARK

Senator W. A. Buchanan was advised Tuesday morning by the secretary to the Governor-General, Viscount Willingdon, that Their Excellencies who will reach the city on July 12 are planning to spend another day in Southern Alberta. On July 13 the vice-regal party may visit Cardston and the famous Mormon temple. From Cardston Their Excellencies plan to motor to Waterton Lakes National Park where they will take lunch. After the party have viewed the many scenic beauties of the park they will return to their special train at Cardston in the evening.

JAPAN TO NAME C. E. HUGHES TO WORLD COURT

Geneva, June 30.—Japan will nominate Chas. Evans Hughes to the world court of international justice if she is assured that Mr. Hughes will accept the position, the Associated Press correspondent learned yesterday. Apparently the various powers are waiting the action of the American group which is authorized to nominate a successor to Dr. John Bassett Moore. If Hughes is the selection, it is believed in league circles that a considerable number of countries, including probably Great Britain and France, as well as Japan, will also propose him.

It is thought here that Mr. Hughes will accept.

BRITISH CRUISER COMPLETE WRECK

Halifax, July 2.—Steaming slowly up Halifax harbor through a dense fog early Monday afternoon, the British light cruiser Dauntless, a unit of the North Atlantic squadron of the British navy, crashed on the Tribune Shoal, well inside the harbor entrance, and was last night exploded.

There are Two Sides to this Story

MOST people think of their Chevrolet dealer as a "NEW-CAR" dealer . . . partly because of the large number of new Chevrolets which they see on the streets. But, while new car sales are the Chevrolet dealer's biggest reason for being in business, they form only one side of his activities. He must not only sell cars but he must also exchange them. Every good, successful Chevrolet dealer must also be a good, successful Used Car dealer. From his experience in selling Chevrolet cars, he knows motor-car values . . . He knows that it is just as important for him to sell a Used Car as a new car . . . He knows that Used Car buyers have a right to as much for their dollar and are entitled to as complete satisfaction as new car buyers. He knows that satisfied Used Car owners will eventually become prospects for new cars . . . In short, our business as Chevrolet dealers depends on our reputation as used car dealers. That is why you are sure of a square deal and a sound dollar-for-dollar value, when you buy a used car here. UC-7-7-185
